SAMBA TOUCH: TAKING VENDING TO THE NEXT LEVEL

With Samba Touch, access to products and information is easy and immediate, using a simple, intuitive and interactive interface. The touch screen makes it possible to browse through the products on sale, and buy multiple items in a single transaction, through the 'basket' feature. Products are also grouped into categories to make browsing for your item easier. For each product, you can also select a screen which contains nutritional information. The operator can tailor deals to specific locations - as well as setting up discounts based on the quantity of products in the basket. The food version also has a softvend elevator as standard. This additional feature makes sure any food items are vended in a delicate manner, so they are received in perfect condition. Samba Touch takes vending to the next level: it is a more flexible vending machine, able to interact quickly with the customer.

TOUCH SCREEN INTERFACE

- 7" Touch Screen
- Menu is easily personalised and products can be browsed by category or by promotion
